

RMS Installation Guide

General Requirements

1. Apache Web Server 1.3 or higher with mod_rewrite enabled;

- PHP 5.6 - 7.3
- functions enabled: exec(); ini_set();
- modules: curl; mysql; mysqli;
- mysql.allow_persistent = On
- mysql.max_persistent = unlimited
- mysqli.allow_persistent = On
- mysqli.max_persistent = unlimited
- zlib;
- constants: allow_url_fopen=true; safe_mode=false;
- directives: memory_limit = 128MB or more; max_execution_time = 60 or more; ability to run PHP via CLI.
- max_input_time 60
- post_max_size 64M
- max_file_uploads 128
- upload_max_filesize 128M

2. MySQL database server 5.0 or higher with ALTER Privileges.

with timeouts:

- interactive_timeout = 300 or more;
- wait_timeout = 300 or more;
- max_allowed_packet = 128M or more;

3. HD space usage: 1GB in standard configuration;

Having shell-access to your server is recommended but not necessary.

We recommend using Hetzner VPS on ([hetzner.com/cloud](https://www.hetzner.com/cloud) - CX11 or better) for about \$5/month, with a free Vesta control panel (vestacp.com).

Installing RMS

Preparation

1. Register a new affiliate account at <https://rms.postaffiliatepro.com/>

2. [Download RMS](#)

Installation

1. Unzip the downloaded archive and copy the files to the directory where you are installing the shop. If you're installing into a subdirectory make sure to edit the .htaccess file so it has the name of the subdirectory. For instance, if you're installing into <http://www.site.com/shop> you should edit .htaccess and change RewriteBase/ to RewriteBase/**shop**
2. **Please check your server parameters before installing RMS.** To do that find the rms_check.php file among the rms files you downloaded and make sure to add your database in these fields:

```
<?php
echo '<h1>Server Parameters CHECKER</h1>';

define("DB_HOST", "localhost");
define("DB_USER", "yourdbseuser");
define("DB_PASSWORD", "password");
define("DB_NAME", "yourdbname");

define("AFF_API_USER", "FILL");
define("AFF_API_TOKEN", "FILL");

tmrmsShopCheck();

function tmrmsShopCheck() {
```

In your browser enter your RMS shop URL and add /rms_check.php

If all the fields are green - you are ok to go on with the installation. Here's how it has to look - https://rms.templates.com/rms_check.php

If some parameters are red - you need to change the values of those parameters. If you don't know how, please ask your hosting tech support to help.

3. Go to data>config and edit the config.php file to add your aff id, shopping cart [language \(locale_id\)](#) and [currency](#). Also add your website domain and address as shown below:

```
<?php
$config ['log_threshold'] = 3;
$config ['log_sql'] = 0;
$config ['currency_id'] = 1;
$config ['currency_symbol'] = '&#8364;';
$config ['currency_code'] = 'EUR';
$config ['preset_code'] = '11111111';
$config ['affiliate_login'] = 'youraffid';
$config ['locale_id'] = 4;
$config ['cypher'] = '690666766605a8306d196e1546656678b660f9e6767d0847c016008226a076a0600640';
$config ['site_domain'] = 'yourwebsite.com';
$config ['site_web_address'] = 'https://yourwebsite.com/|';
```

!! Please use the referral id in the affiliate_login line, not your email address. Your referral id can be found [here](#)

4. Create a new empty database on the server to store the RMS data.
5. If you have shell-access to your server, launch the 'diagnostics.php' command. It will do the diagnostics, check the configuration and report errors (if any). Most often, errors occur due to the files/directories permissions set incorrectly. In case the files permission is the problem, the diagnostics also delivers the list of the commands to set the needed files permission when executed from the command line. Mostly you will need to change the permission for files in root directory of your shop to "0644"

If you have no shell-access to your server you should set "0777" permission for the data/logs and data/template_c directories.

6. In your browser field enter your RMS shop URL and add index.php/install It should be noted that "/install" is not the store file or folder but just a virtual directory to proceed with the shop installation, so the shop archive does not contain it.

So in the browser you enter the URL as `http://www.site.com/index.php/install`

or

`http://www.site.com/shop/index.php/install` (if you're installing into a subdirectory).

7. From the browser you are taken to the 'Checking requirements' step.

Checking requirements

Your server has been tested for RMS compatibility.

If fatal errors (RED colored) are found the RMS installation could not be started.

Php version 5.2 or max version 7.4	7.3.17
Apache module mod_rewrite	installed
PHP extension spl	installed
PHP extension zlib	installed
PHP extension json	installed
PHP extension curl	installed
PHP extension mysql/mysqli	installed
Configuration option allow_url_fopen must be true	OK
Configuration option safe_mode must be false	OK
Memory limit of 64M or higher	128M
File /usr/local/www/rms.templates.com/nastya/data/config/routes.php must be writeable	OK
Directory /usr/local/www/rms.templates.com/nastya/data/logs must be writeable	OK
Directory /usr/local/www/rms.templates.com/nastya/data/template_c must be writeable	OK
Directory /usr/local/www/rms.templates.com/nastya/uploads must be writeable	OK
Directory /usr/local/www/rms.templates.com/nastya/banners must be writeable	OK
Javascript	OK
Directory /usr/local/www/rms.templates.com/nastya/data/tmp must be writeable	OK
Directory /usr/local/www/rms.templates.com/nastya/data/config must be writeable	OK
File /usr/local/www/rms.templates.com/nastya/data/config/config.php must be writeable	OK

Proceed to step 2

Hosting requirements

1. Linux/Unix Hosting
2. HTTP server. The affiliate shop was tested on Apache 1.3+
3. PHP 5.2.x
4. MySQL server with ALTER privileges
5. 15GB of free space in case you would like to save template screenshots to your server.

In this step you get tests that your run-time environment should match before you proceed installing. They are actually the same tests as in diagnostics with the difference that diagnostics can be accessed via the command line only.

8. Once the testing is passed successfully there shows a page with the 'Proceed to Step 2' button and the shop parameters displayed in green (if OK). In case there are errors they are either displayed in red, or you get an 'Under Construction' page instead. If this occurs please check the rms_check.php file again and change inappropriate parameters according to the requirements specified in the very beginning of this guide, or ask your hosting administrator to change them if possible.
9. Press "Proceed to step 2".
10. Please read and confirm you accept the licensing agreement, press 'I accept. Start installation'.

READY MADE SHOP SETUP

User agreement

Setup Wizard :: STEP 1

Welcome to the installation guide of MytemplateStorage Ready Made Affiliate Shop. We promise the installation won't take you long, just a few steps on your way to selling templates from your own website. Please review hosting requirement below to make sure the Ready Made Affiliate Shop will get successfully installed and running on your server.

License Agreement

1. We grant you the right to modify the design and code of the Ready Made Affiliate Shop to the extent needed, however will not provide support for any modifications made nor we will provide support how to handle this or that modification. We support the Ready Made Affiliate Shop in its initial state only.
2. You may not resell the Ready Made Affiliate Shop to some other party.
3. You may not create a product/software of your own based on the Ready Made Affiliate Shop and resell it or redistribute it.
4. We have used several opensource products for the development of the Ready Made Affiliate Shop. When accepting this agreement you confirm that you have read the licence agreements from below. By accepting our License Agreement you accept these agreements by default:
- [Kohana License Agreement](#)

By clicking on 'I accept' below you are agreeing to the Terms of Service above and both the Program Policy and the Privacy Policy.

11. Press 'Proceed' to skip the 'Existing setup settings' step.

READY MADE SHOP SETUP

Existing setup settings

If you have the custom settings file please upload ot below:

Note: Custom settings file is meant for advanced users only, please do not try uploading just some file.

File with initial settings was not found

Please select one of:

Settings: Файл не выбран

12. Database connection. In this step you are supposed to enter the correct parameters to access your database server. To clarify - these are the parameters you set up in step 4. Please, enter:

Host – the database server address (set as 'localhost' by default).

Port – the database service port (set '3306' by default).

Database – the database name (the one you created to be used by the RMS shop).

Table prefix – the table names prefix. If you have only one database then having a prefix enables you to distinguish between the RMS application and other tables. This field is not obligatory.

User and Password – the database username and password.

To proceed and check if the database settings are correct click 'Connect to Database'.

READY MADE SHOP SETUP

Database connection

Please enter the Database details (check with your hosting company if you don't have them or don't know how to create the database)

Host:

Port:

Database:

Table Prefix:

User:

Password:

Import Initial Dataset:

13. In 'Affiliate settings' enter your e-mail address. It will be used as the RMS admin e-mail address. You will receive your RMS admin area username and password to this email. Click 'Next' to proceed.

READY MADE SHOP SETUP

Affiliate settings

Affiliate Login:

Preset Code:

Email:

14. 'Template settings'. In this step you can select the template types and categories you would like to display in the RMS store. If you choose to display all available templates you can skip it and click 'Next' to proceed.

READY MADE SHOP SETUP

Template settings

Choose what types and categories of templates you would like to display in your Ready Made Affiliate Shop.

Show Adult Templates:

Customize Template Categories:

Customize Template Types:

15. **Important:** if you choose particular template types and categories in this step you will NOT be able to enable their display from the shop admin area once the shop is installed and will need to re-install the shop over again to enable them. So if you're not sure which particular types and categories you would want to display now and may want to change them later - choose all available types and categories display in this step and manage them from the shop admin once the shop is installed.

16. We strongly recommend to select following categories:

Choose categories

17. Installation. In this step you get the final notification before you start installation. When ready, press 'Install'. The installation may take a certain amount of time and it is not recommended to abort it.

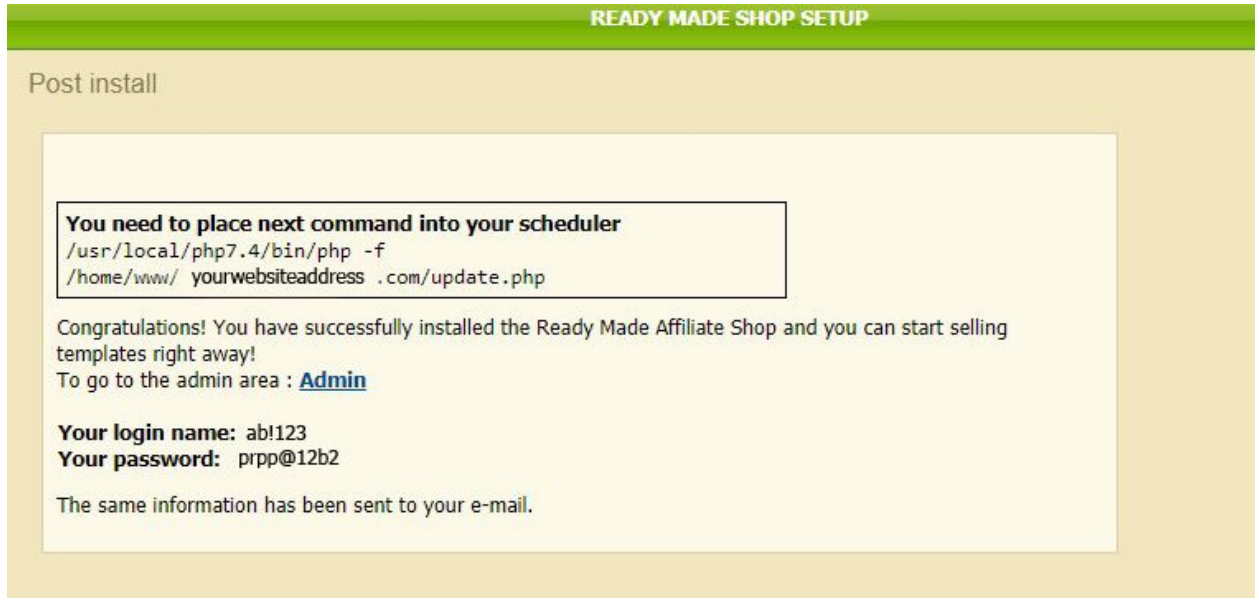

READY MADE SHOP SETUP

Installation

You have made all the necessary settings for your Ready Made Affiliate Shop. Click on the Start button below to start the software installation on your server. It may take several minutes for the installation, please be patient. Don't click on "Back" button of your browser and please don't refresh or stop the page. You will be notified once the installation is complete.

18. Once the shop is installed you are delivered the RMS update command that is to be added to a cron job or another scheduler on your hosting to run updates (we recommend to run updates daily). [This video](https://youtu.be/leQfX_7JSRg) shows how to do that.

You are also delivered the RMS admin access details (username and password):

The just installed shop displays a minimal amount of templates, just to show the shop is installed and working OK. Once updated through the CRON command it displays the rest of the available templates including the newest ones.

Set-up

Now we can proceed to customize your shop.

Implement the settings by following the next steps below. **For more info on what your admin area has to offer please refer to the help tab.**

1 Navigate to Settings-> RMS Settings.

- Change the values: FEATURED_TYPE_COLS to 20, FEATURED_TYPE_ROWS to 1.
- Disable INCOMING_CATEGORY_VISIBILITY, INCOMING_PACKAGE_VISIBILITY and INCOMING_TYPE_VISIBILITY.
- Change the values: TEMPLATE_COLS to 4, TEMPLATE_ROWS to 5.
- Press 'Update'.

Update

2 Go to Settings -> User Settings. (Example on screenshot below)

- **Enable slider** (disabled by default): press Add New user setting. Add "SLIDER" to the Name field. Add "Enable slider" to the Description field. Add "true" to the Value field and click Submit. Change the value field to false to disable slider.
- **Enable Webstudio** (optional): press Add New user setting. Add "WEBSTUDIO" to the Name field. Add "Enable webstudio shop" to the Description field. Add "true" to the Value field for WEB-STUDIO and click Submit.
- **Add WebStudio Email** (optional): press Add New user setting. Add "WEBSTUDIO_EMAIL" to the Name field. Add "your email the template orders will be delivered to" to the Description field. Add the email you would like the template orders to be delivered to to the Value field. Click Submit.
- **Enable/disable presale chat** (enabled by default): press Add New user setting. Add "PRESALECHAT" to the Name field. Add "Enable chat" to the Description field. Add "false" to the Value field and click Submit.

- **Enable/disable the “UP” button** (enabled by default): press Add New user setting. Add “ARROW” to the Name field. Add “Enable/disable to top arrow” to the Description field. Add “false” to the Value field and click Submit.
- **Enable/disable Banners and Testimonials.** Add “true” (to enable), or “false” (to disable) to the Value field and click Submit.

The screenshot shows the 'User Settings' page. The 'User Settings' tab is selected in the top navigation. Below the navigation, there are several tabs: 'RMS Settings', 'Info Settings', 'User Settings', 'System Info', 'Change password', 'Import/Export', and 'Migration 3.xx-4.xx'. The 'User Settings' tab is active. The main content area is titled 'User Settings' and contains a table with the following data:

Delete	Title	Description	Value
<input type="checkbox"/>	ARROW	Enable/disable to top arrow	true
<input type="checkbox"/>	BANNERS	Enable featured banners	true
<input type="checkbox"/>	FEATURED_SLIDER_OFF	Disable slider of featured templates on main page	true
<input type="checkbox"/>	HIDE_TEMPLATES	Template numbers to be hidden separated by comma	
<input type="checkbox"/>	META_TITLE	Add custom meta-title	Template Shop Online
<input type="checkbox"/>	PRESALECHAT	PRESALECHAT	true
<input type="checkbox"/>	SLIDER	Enable slider	true
<input type="checkbox"/>	TESTIMONIALS	Enable testimonials	true

Buttons for 'Add new', 'Delete checked', and 'Update' are visible at the bottom of the table.

3 Go to Routes -> Type Routes and change the value Other Pages Type Route to:

Other Pages Preview Route	<input type="text" value="joomla-type/17955/Homepage.html"/>	<input type="text" value="%TYPE%-type/%TEMPLATE-ID%/PAGE-NAME%.html"/>

5 Edit Types/Categories: If you want to hide some types or categories go to Texts -> Types/categories, choose the needed template type/category on the left and change Visibility from Visible to Hidden in the Main Properties section on the right.

To sort types/categories in alphabetical order press the orange triangle on the left and choose "sort in alphabetical order".

6 Set Featured types: Navigate to Texts -> Featured Types and drag the needed featured types (will be displayed on the home page) to the left column.</p>

7 Change copyright: Go to texts - > Global texts - > Copyright and change the Text content field.

8 Add Google Analytics: Go to texts - > Global texts - > GLOBAL_HEAD_SCRIPT and add the script to the Text content field, make sure to add the Title too:

Edit GLOBAL_HEAD_SCRIPT

Name: GLOBAL_HEAD_SCRIPT

Title: GLOBAL_HEAD_SCRIPT

Text Content:

```
<!-- Global site tag (gtag.js) - Google Analytics -->
<script async
src="https://www.googletagmanager.com/gtag/js?id=
"></script>
<script>
  window.dataLayer = window.dataLayer || [];
  function gtag(){dataLayer.push(arguments);}
  gtag('js', new Date());
```

Submit Cancel

9 Add Demo page:

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to
- Add new page.
- Add "demo" to the Name field
- Set Internal for the Link Class field
- Add "demo" to the Internal Link Alias field
- Add "#TEMPLATE-ID Preview" to the HTML Title Name field
- Add "demo" to the List Name field
- Set default for the Layout field
- Set Hidden for the Visibility field
- Press Submit.

The screenshot shows the 'User Pages' configuration interface. At the top, there is a navigation bar with 'Pages' highlighted. Below it, 'User Pages' is selected from a dropdown menu. The main content area is titled 'User Pages' and contains a 'Legend' for visibility settings, a 'Main' sidebar with a list of pages (about-us, demo, frequently-asked-questions, privacy-policy, terms-of-use), and a 'User Page DEMO' configuration form. The form has tabs for 'Main', 'Meta-tags', and 'Text blocks'. The 'Main parameters' section includes fields for Name (demo), Link Class (Internal), Internal Link Alias (demo), Target='_blank' (checkbox), HTML Title Name (#TEMPLATE-ID Preview), List Name (demo), Layout (default), and Visibility (Hidden). A Submit button is at the bottom.

10 Add F.A.Q. page:

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to
- Add new page
- Add "frequently-asked-questions" to the Name field
- Set Internal for the Link Class field
- Add "frequently-asked-questions" to the Internal Link Alias field
- Add "frequently-asked-questions" to the HTML Title Name field
- Add "frequently-asked-questions" to the List Name field
- Set frequently-asked-questions for the Layout field
- Set visible for the Visibility field
- Press Submit.

11 Add Terms of Use page:

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to
- Add new page.
- Add "terms-of-use" to the Name field
- Set Internal for the Link Class field
- Add "terms-of-use" to the Internal Link Alias field
- Add "terms-of-use" to the HTML Title Name field
- Add "terms-of-use" to the List Name field
- Set terms-of-use for the Layout field
- Set visible for the Visibility field

- Press Submit.

12 Add Privacy Policy page:

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to
- Add new page.
- Add “privacy-policy” to the Name field
- Set Internal for the Link Class field
- Add “privacy-policy” to the Internal Link Alias field
- Add “privacy-policy” to the HTML Title Name field
- Add “privacy-policy” to the List Name field
- Set privacy-policy for the Layout field
- Set visible for the Visibility field
- Press Submit.

13 Add About Us page:

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to
- Add new page.
- Add “about-us” to the Name field
- Set Internal for the Link Class field
- Add “about-us” to the Internal Link Alias field
- Add “about-us” to the HTML Title Name field
- Add “about-us” to the List Name field
- Set about-us for the Layout field
- Set visible for the Visibility field
- Press Submit.

Page Demo is compulsory for any custom template shop. These three pages - F.A.Q., Terms of Use and About Us - are displayed in our theme’s main menu by default. You can customize them in “theme”/pages/ and you can change the layout of the main menu in file “layout.php”.

14 **Add your own (custom) page.** Check this [video example](#) of how to add custom page. The provided example shows old RMS theme, but the only difference is that it will not be added to the top menu automatically. You have to add the link to your new page in “layout.php” file.

15 Hide specific templates (optional):

- Go to Settings -> User settings and press Add New.
- Add “HIDE_TEMPLATES” to the Name field.
- Add “Hide templates, put numbers separated by comma” to the Description field.

- Add the ID's of the templates you would like to hide (separate them with comma) to the Value field.
- Click Submit.

User Settings

Add new

Delete	Title	Description	Value
<input type="checkbox"/>	ARROW	Enable/disable to top arrow	<input type="text" value="true"/>
<input type="checkbox"/>	BANNERS	Enable featured banners	<input type="text" value="true"/>
<input type="checkbox"/>	FEATURED_SLIDER_OFF	Disable slider of featured templates on main page	<input type="text" value="true"/>
<input type="checkbox"/>	HIDE_TEMPLATES	Template numbers to be hidden separated by comma	<input type="text"/>
<input type="checkbox"/>	META_TITLE	Add custom meta-title	<input type="text" value="Template Shop Online"/>
<input type="checkbox"/>	PRESALECHAT	PRESALECHAT	<input type="text" value="true"/>
<input type="checkbox"/>	SLIDER	Enable slider	<input type="text" value="true"/>
<input type="checkbox"/>	TESTIMONIALS	Enable testimonials	<input type="text" value="true"/>

Delete checked **Update**

16 Change WebStudio Header text (optional):

- Go to Texts -> Global Texts and press Add New.
- Add "WEBSTUDIO_HEADER_TEXT" to the Name field.
- Add "WEBSTUDIO_HEADER_TEXT" to the Title field.
- Add "Select a Template for Fast Website Setup" and press Submit.

17 Set Template Advantages text (optional):

- Go to Texts -> Global Texts and press Add New.
- Add TEMPLATE_ADVANTAGES to the Name field.
- Add By purchasing a template you get to the Title field.
- Add the below to the Title field (remove the spaces first):

```
<p>< ul class = " template-advantages " ></p>
<p>< li >A Professionally Designed Website< /li></p>
<p>< li >Technical Help and Support< /li></p>
<p>< li >Your Web Studio Advantages< /li></p>
<p>< li >Your Web Studio Advantages< /li></p>
<p>< li >Your Web Studio Advantages< /li></p>
```

<p></ ul ></p>

- Press Submit.

18 Add Privacy Page (optional):

- Navigate to Pages -> User Pages and press the orange triangle on the left, then go to Add new page.
- Add Privacy to the Name field
- Set Internal for the Link Class field
- Set terms-of-use for the Internal Link Alias field
- Set terms-of-use for the HTML Title Name field
- Set terms-of-use for the List Name field
- Set terms-of-use for the Layout field
- Set Visible for the Visibility field
- Press Submit.

19 **Change Logo/favicon:** to change the logo simply replace a logo.png and logo-white.png files in your /themes/theme-2018-v03-en/images/ folder. The same procedure with favicon: replace favicon.png file in your /themes/theme-2018-v03-en/images/ folder.

20 **Change title of the site:** Settings > User Settings, add your site's meta title to the META_TITLE field and press the Update button.

The screenshot shows the 'User Settings' page. The navigation bar includes 'Home', 'Settings', 'Routes', 'Texts', 'Pages', 'Editors', 'Banners', and 'Help'. Below the navigation bar, there are links for 'RMS Settings', 'Info Settings', 'User Settings', 'System Info', 'Change password', 'Import/Export', and 'Migration 3.xx-4.xx'. The 'User Settings' section contains a table with the following data:

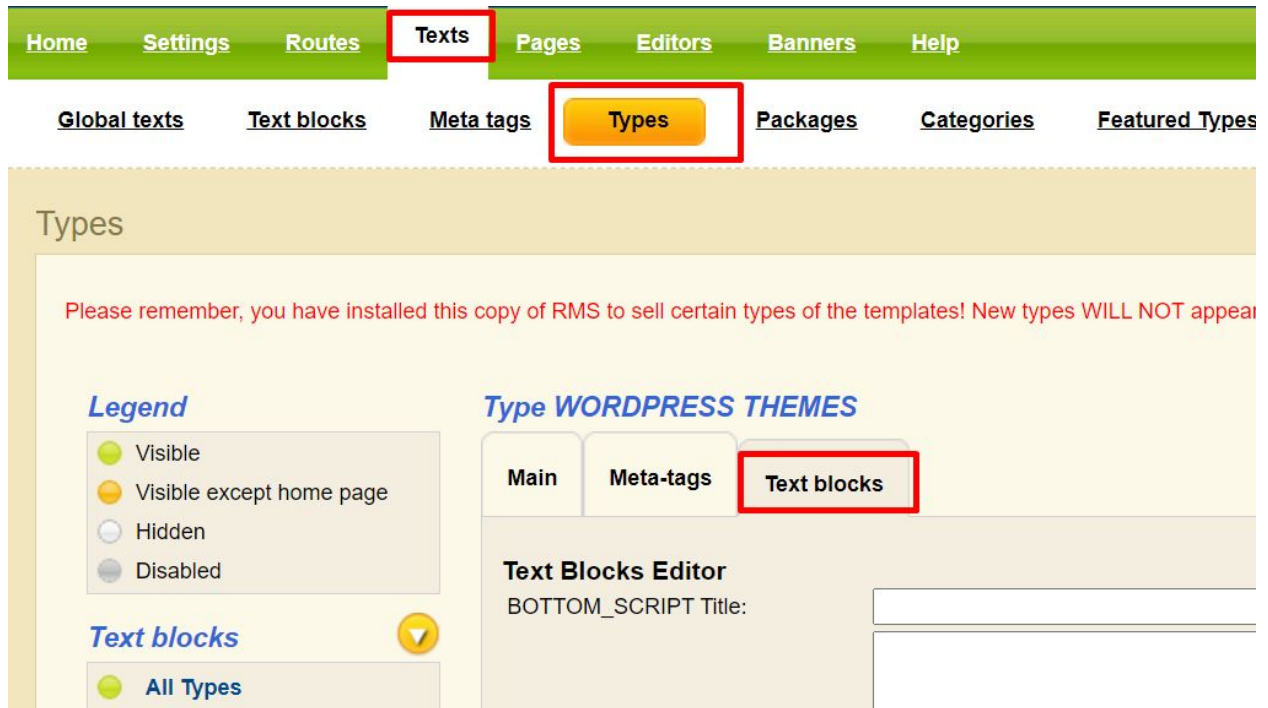

Delete	Title	Description	Value
<input type="checkbox"/>	ARROW	Enable/disable to top arrow	<input type="text" value="true"/>
<input type="checkbox"/>	BANNERS	Enable featured banners	<input type="text" value="true"/>
<input type="checkbox"/>	FEATURED_SLIDER_OFF	Disable slider of featured templates on main page	<input type="text" value="true"/>
<input type="checkbox"/>	HIDE_TEMPLATES	Template numbers to be hidden separated by comma	<input type="text"/>
<input type="checkbox"/>	META_TITLE	Add custom meta-title	<input type="text" value=" Template Shop Online"/>
<input type="checkbox"/>	PRESALECHAT	PRESALECHAT	<input type="text" value="true"/>
<input type="checkbox"/>	SLIDER	Enable slider	<input type="text" value="true"/>
<input type="checkbox"/>	TESTIMONIALS	Enable testimonials	<input type="text" value="true"/>

Buttons: 'Add new', 'Delete checked', 'Update'.

21 Add custom descriptions to product types and categories.

To make your store unique and promote the products better you need to add custom content to it.

Go to Texts > Types. Choose the product type to add a description to and select the “text blocks” tab:

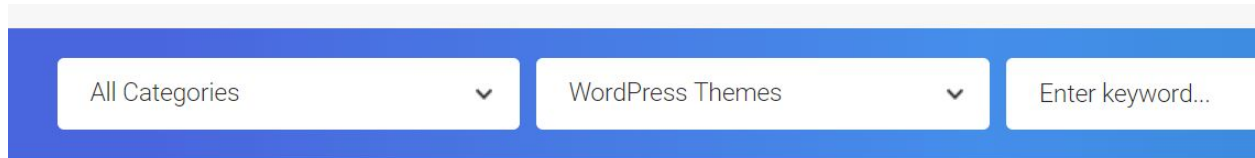

The screenshot shows the RMS administration interface. The top navigation bar includes 'Home', 'Settings', 'Routes', 'Texts', 'Pages', 'Editors', 'Banners', and 'Help'. The 'Texts' menu item is highlighted with a red box. Below it, the 'Types' sub-menu item is also highlighted with a red box. The main content area is titled 'Types' and contains a red warning message: 'Please remember, you have installed this copy of RMS to sell certain types of the templates! New types WILL NOT appear'. Below the warning, there is a 'Legend' section with four options: 'Visible' (green circle), 'Visible except home page' (orange circle), 'Hidden' (grey circle), and 'Disabled' (grey circle). To the right of the legend is a section titled 'Type WORDPRESS THEMES' with three tabs: 'Main', 'Meta-tags', and 'Text blocks'. The 'Text blocks' tab is selected and highlighted with a red box. Below the tabs is the 'Text Blocks Editor' section, which includes a 'BOTTOM_SCRIPT Title:' label and a text area containing the text 'Your custom description goes here'.

To add the text to the top of the product type page use the Header Title and Header Content fields:

The screenshot shows the 'Header Title' and 'Header Content' fields in the RMS interface. The 'Header Title' field contains the text 'WordPress Themes' and the 'Header Content' field contains the text 'Your custom description goes here'.

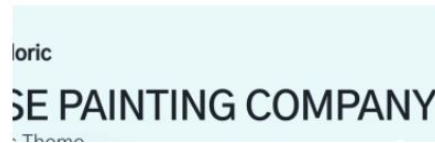

Don't forget to click the Submit button at the bottom of the page. The result will look like this:

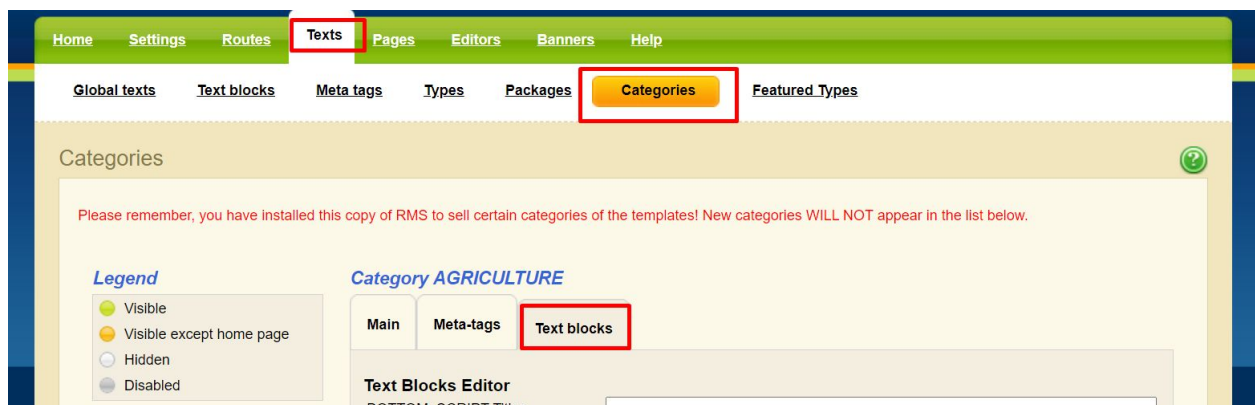

[Home](#) | WordPress Themes

WordPress Themes

Your custom description goes here

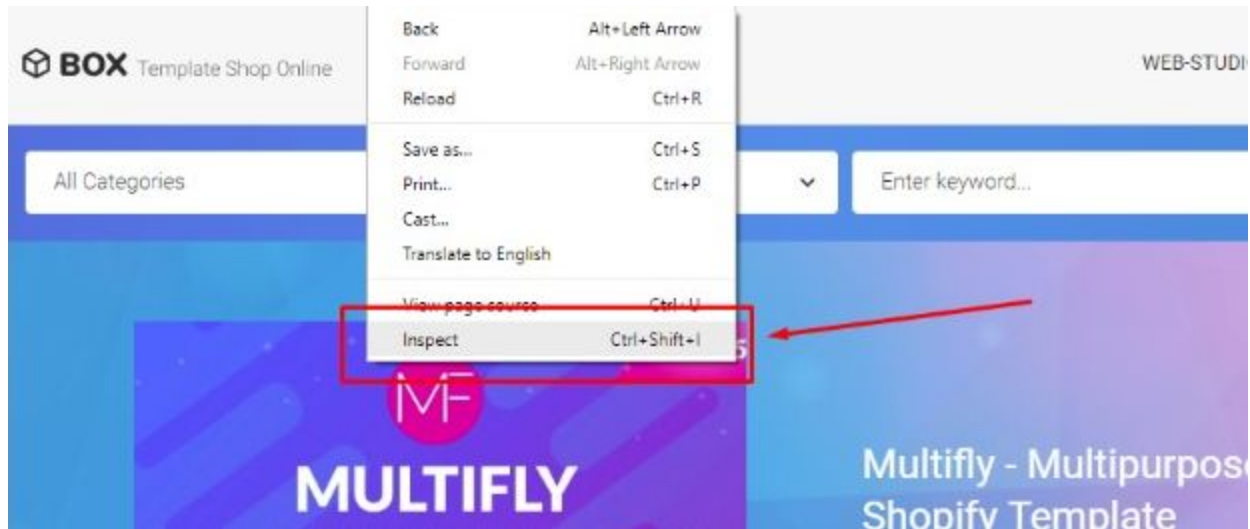

To add descriptions to categories follow the same procedure:

22 Change color scheme of your store: you need to have basic knowledge of HTML and CSS. The colors of all elements are indicated mostly in file styles.css, located in /themes/theme-2018-v03-en/css/ folder. And some style of the demo page elements are specified in demo.css file. The procedure is as follows:

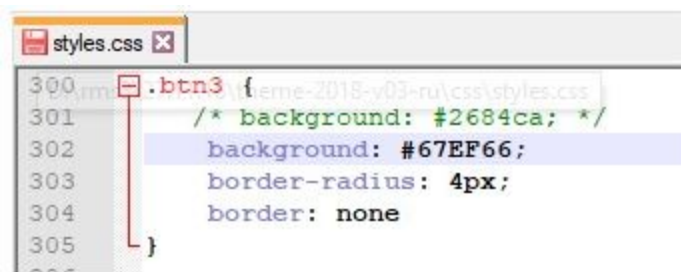

1) inspect the element you would like to change color on page

2) find the proper selector (in this case it is class `.btn3`), property (background) and value (`#2684ca`)

3) open the file (in this case - `styles.css` on line 300), find these properties there and change the value on any color you want. We recommend commenting the code you want to make changes to, so you will be able to discard changes quickly. Do not forget to save the file and upload it back to your server in case you are editing it locally.

4) Repeat the actions above till all of the elements are customized.

23 **Speed up your store** (optional): we recommend using CloudFlare service.

24 Promote your store

We have prepared a number of animated banners to help you with promoting your store. Download them [here](#).

The banners come in these sizes: 300x250, 336x280, 468x60, 728x90. The types of products in these banners are HTML, WordPress, WooCommerce, Resume, and Corporate Identity templates. The files include PSDs, so you can easily add your logo to them.
